<p>Feedback: <i>Staff</i> Bad idea. Parking is also an issue already. Please build a parkade next to it and incorporate it into your plans if you happen to proceed. The noise level around the totem area is also terrible for us current residents. Please reconsider.</p>	<p>Removal of the surface lot is part of a long-standing strategy to shift parking to more efficient parkade facilities and optimize land use for university priorities. Parking is available at West Parkade. There will also be some short-term parking available as part of this project.</p> <p>This new residence will be separated from Hawthorn Place by a large field thereby buffering noise that may be generated by the new residence.</p>
