Community engagement on Campus Vision 2050, the amended Land Use Plan (LUP) and draft Housing Action Plan (HAP) has concluded until a legislatively required public hearing for the LUP is scheduled. Community input over the past 18 months of this process has been crucial to advancing land use policies and plans that balance a range of priorities and needs for our community and in supporting the academic mission of UBC. The draft Campus Vision 2050, LUP and HAP are now being updated to reflect input received. The next update for the UBC Board of Governors on the Campus Vision 2050 process will be in the fall.

To date, there have been 13,000 touchpoints across two phases of broad public engagement, which included workshops, roadshows, community conversations and online surveys, and targeted meetings with project advisory committees, faculty, technical experts and key interest groups on campus. Engagement with Musqueam continues in alignment with completion of a new Relationship Agreement being developed between Musqueam and UBC.

Concurrent with the ongoing Campus Vision 2050 process, work is continuing on policies, technical analysis and plans that will support implementation of Campus Vision 2050, the HAP and the LUP.

This work includes:

- updates to Neighbourhood Climate Action Plan and Residential Environmental Assessment Program;
- completing an ecological baseline for the campus;
- updating the Transportation Plan;
- creating a Community Amenities Strategy, including updating the Child Care Expansion Plan; and
- preparing for upcoming Campus Plan and neighbourhood planning processes.

[Learn more](#) about opportunities to connect with the Campus Vision 2050 team over the summer, such as through campus walking tours and neighbourhood events.
